Wayne,

I did not go out to ST012 today, but called Tiana at AMEC to get an update. Both boreholes have been completed and well construction is proceeding. According to Tiana, neither boring showed any indications of hydrocarbon impact. CZ24/UWBZ38 are being constructed as proposed. Boring SB17 has been converted to well LSZ55. Due to conflicts with the proposed location of this boring, it was moved south and is in the center of the parking lot. Because it is now relatively close to CZ24/UWBZ38, they converted it to the well. Due to its proximity to the nested well, it doesn't look like they are going to drill another boring and or LSZ well in this area, although Tiana wasn't completely sure what the plan is. I attached a figure showing the approximate revised well location for LSZ55.
